PROFESSIONAL SUMMARY

Software developer and IT systems administrator specializing in full-stack business systems, Laravel/PHP backends, React product interfaces, and production server operations. Built a 2020-2024 freelance/personal foundation across school, pharmacy, inventory, store, e-commerce, institute-management, and ordering systems before moving into CMS and production product work. Strong across API design, authentication, data modeling, real-time features, responsive UI, Linux/Docker/Nginx environments, documentation, and stakeholder coordination.

CORE HIGHLIGHTS

Full-stack delivery

React/Vite interfaces, Laravel/PHP APIs, Express/MongoDB services, and admin workflows

Business systems

Bookings, tournaments, CMS modules, e-commerce, inventory, education, and ticketing flows

Operations support

Linux, Docker, Nginx, domains, hosting, backups, access control, and workspace administration

Documented handoff

Developer guides for page builders, site settings, system logic, AZ CSS, and AZ Animation

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Backend: Laravel, Node.js, Express.js, REST APIs, Laravel Sanctum, FilamentPHP, Composer, authentication, RBAC

Frontend: React, Vite, Tailwind CSS, Bootstrap, EJS, responsive UI, page builders, localization, animation libraries

Databases: MySQL, MongoDB, SQL modeling, document data modeling

DevOps & IT: Linux/Ubuntu, Docker, Docker Compose, Nginx, Apache, Git/GitHub, domains, hosting, backups, access control

Business Operations: Google Workspace, Microsoft 365, employee IT support, subscriptions, technical documentation, cross-functional coordination

PROFESSIONAL EXPERIENCE

Software Developer & IT Systems Administrator | Next Level Group Iraq

Baghdad, Iraq | Jan 2026 - Present

- Build and maintain the under-development Next Level Social & E-sport Platform, a React/Vite and Express/MongoDB product covering authentication, onboarding, profiles, social feed, posts, comments, follows, stories, chat, notifications, venue branches, bookings, events, tournaments, and admin workspaces.
- Implemented e-sport event operations including event creation and editing, rules, registration, participant management, attendance, applications, pools, seeding, bracket previews, and double-elimination tournament workflows.
- Designed branch, station, booking, and XP/progression APIs for venue details, coordinates, station tiers, availability, pricing, booking confirmation, happy-hour logic, and user-activity rewards.
- Support production and company IT operations across Linux servers, Docker/Docker Compose, Nginx, domains, hosting, Google Workspace, Microsoft 365, subscriptions, access permissions, backups, disaster recovery, and Tier 2/3 employee support.

Software Developer | A-Z Business Ecosystems LLC

Remote / United States | Jan 2025 - Jan 2026

- Built and enhanced modular CMS components using Laravel, PHP, JavaScript, Python, SQL, reusable services, and maintainable backend structures.
- Applied clean architecture principles to Laravel-based CMS work so internal modules were easier to extend, debug, and hand off to other developers.
- Worked with REST APIs, JSON data structures, database-backed workflows, and internal/external service integrations across interconnected modules.
- Created responsive frontend pages and developer documentation for Page Builder behavior, site settings, system logic, AZ CSS, and AZ Animation to reduce onboarding and support friction.

Freelance Software Engineer | Independent Freelance & Personal Projects

Baghdad, Iraq / Remote | 2020 - 2024

- Built public GitHub projects during a freelance/personal work period, progressing from PHP/MySQL administrative systems into stronger Laravel, API, authentication, and role-based backend work.
- Completed early school and pharmacy management systems in 2020, then inventory and store-management systems in 2021 with stock tracking, order workflows, reporting, search, filters, receipts, and admin screens.
- Built a 2022 e-commerce project with product media, registration/login, PHPMailer email verification, responsive pages, JavaScript validation, cart behavior, and payment-oriented UI.
- Developed institute-management web and API projects in 2023, covering students, courses, attendance, assignments, posts, YouTube resources, enrollment flows, and Sanctum authentication.
- Completed the 2024 Order Task Demo, a Laravel 11+ ordering API with Sanctum, FilamentPHP, products, carts, orders, stock updates, filtering, and role-based access control.

| SELECTED PROJECTS

Next Level Social & E-sport Platform

Live under-development product | React, TypeScript, Node.js, Express, MongoDB, Socket.IO, Docker, Nginx

- Full-stack social and e-sport platform with community feed, profiles, follows, stories, chat, notifications, branch browsing, bookings, events, tournaments, pools, seeding, and bracket workflows.

Order Task Demo

Freelance/personal GitHub project, 2024 | Laravel 11, Sanctum, FilamentPHP, MySQL, REST APIs

- Built a Laravel ordering API with token authentication, product management, cart workflows, order processing, stock updates, filtering, role-based access control, and a FilamentPHP admin panel.

Institute Management System API

Freelance/personal GitHub project, 2023 | Laravel, Sanctum, MySQL, REST APIs

- Modeled education workflows around courses, student enrollments, assignments, posts, YouTube resources, and token-authenticated API behavior.

A-Z CMS Modules

Professional CMS work | Laravel, PHP, JavaScript, Python, REST APIs, SQL

- Built CMS modules, reusable services, responsive page-builder features, API integrations, and internal documentation for developer-facing platform work.

Next Level Store

Live commerce platform | Express, EJS, JavaScript, Tailwind CSS, OAuth, email, uploads

- Supported storefront, product, brand, collection, cart, checkout, order, favorites, support, session, upload, Google OAuth, email, image-processing, and spreadsheet workflows.

Padel IQ Website

Live venue website | React, Vite, TypeScript, i18n, routing, maps, animation

- Worked on a responsive live venue site using a modern React/Vite stack with localization, routing, Google Maps packages, animation libraries, and component styling.

Vantom IQ Website

Live business platform | Express, EJS, MongoDB/Mongoose, LokiJS, Socket.IO, Tailwind CSS

- Supported product, collection, checkout, favorites, order, saved-date, upload, database, and server-rendered views for a production-facing platform.

E-commerce Platform

Freelance/personal GitHub project, 2022 | PHP, MySQL, JavaScript, PHPMailer, Docker

- Built online-store workflows with product videos, registration/login, email verification, responsive pages, JavaScript validation, cart behavior, and payment-oriented UI.
